Safety - Please remember to stay a safe distance away from the construction equipment as the roadwork is completed. Although you may be able to see the construction workers, they may not be able to always see you. We want to make sure that everyone stays safe, including the children in the neighborhood, and any other pedestrians that may be near the work site.

If you need to speak with a worker, please use the phone numbers above or wave someone over while keeping a safe distance away.

2025 Project Overview

Avon Township is planning to resurface approximately 1.6 miles of Queens Road from County Road 9 to a point approximately a half mile north of County Road 155 (as shown on map below) this Summer. Knife River Corporation will be the contractor in charge of the work. The work is scheduled to begin this coming week and the Contractors will be reclaiming the existing bituminous surfacing, re-grading, and then paving a new bituminous surface. The current roadway width is being maintained.

Access to your driveway should be maintained during the project with only some short term delays if the Contractor's grading or paving equipment is working past your property.

The project work is expected to take approximately two to three weeks.

If you have any questions about the upcoming project please feel free to contact the Stantec team first. The contact information is provided on the left side of the page.

Other Project Notes:

- Garbage pickup and mail delivery should not be impacted by the project. The Contractor will work to keep access for these services during the work.
- Some minor delays may occur during the project and at times the crew may be working in front of your driveway. Please plan in advance if you are concerned about getting a vehicle, camper, or other items in and out of your driveway.
- Please drive slowly through the active construction areas and keep it safe for the Contractors working.
